Dear NNOHA Members,

I am excited to inform you of an important leadership transition at the National Network for Oral Health Access (NNOHA). As many of you know, NNOHA’s first Executive Director, Colleen Lampron, resigned to take another position last year after successfully guiding the growth of NNOHA to its current nationally recognized profile.

With the help of an experienced Executive Recruiter, the Search Committee conducted an extensive four-month nationwide search to identify a director who will move NNOHA into its next phase of development and service. On behalf of the Board and staff, I am thrilled to announce the hiring of Annette Zacharias as NNOHA’s new Executive Director.

Annette Zacharias has been in nonprofit management for over 20 years. Her expertise and experience in developing collaborations has resulted in a career of sustainable programs, successful new ventures and a passion for serving others. Annette is the former Executive Director of the Women’s Resource Center, a northern Colorado nonprofit agency dedicated to assisting women overcome barriers to health and dental care through the use of continuums of care and coalition building. Annette was the chair of the Larimer County Women’s Health Consortium, which has been recognized nationally by Susan G. Komen for the Cure. She was also a managing partner of the new “Dental Connections” program in Larimer County, Colorado. Dental Connections is a community model of oral health care delivery utilizing both public and private partnerships to create access, case management and care delivery. In addition, she has served on the City of Fort

(Continued on page 2)
NNOHA Welcomes New Executive Director (Continued from page 1)

Collins Women’s Commission, Unidos por la Salud and many other community boards and coalitions. She earned her undergraduate degree at Colorado State University and has two children.

Annette says, “I am excited to join NNOHA. I’m committed to working with our partners to create systems of support to allow all of us to serve individuals in need and improve their oral health care. I look forward to our work together.”

Annette began working full-time with NNOHA on February 6th. Please join the Board in welcoming Annette to NNOHA and helping her understand even better the issues you and your patients face.

Sincerely,

Wayne Cottam, D.M.D., M.S.
NNOHA President

More Staff Changes at NNOHA

NNOHA is also delighted to announce the hiring of Maria Smith, MPA as its new Project Coordinator. Previously, Maria was employed at The Keystone Center, in Keystone, CO, where she provided facilitation and logistics support for public engagement meetings on childhood vaccines, and emergency and pandemic preparedness. She has also worked as an English Language Teaching Assistant in Madrid, Spain, and as an intern on Capitol Hill. Maria has a Master of Public Administration from Cornell University and a Bachelor of Arts in Political Science and Spanish from Moravian College. Her academic studies focused on health care policy. She is fluent in Spanish, enjoys traveling and experiencing other cultures, skiing, and playing basketball. Please join us in welcoming her to the NNOHA team!

Barbara Bailey, RDH, PhD, served as Interim Executive Director of NNOHA for the last five months to help NNOHA transition and keep the organization running during the Executive Director search process. Upon the successful hiring of Annette Zacharias, Barbara’s role will come to an end on February 29. The NNOHA Board and staff appreciates Barbara’s support and leadership during the transition. Thank you, Barbara!

Barbara Bailey, RDH, PhD

Dear NNOHA Members, Board and Wonderful Staff,

It has been my sincere pleasure to work with you for the past nearly five months during the search for a new permanent Executive Director. I want to take this opportunity to thank you for your support and hard work. We have accomplished a great deal during this brief period. In addition to our new Executive Director, Annette Zacharias, we have hired an outstanding new Project Coordinator, Maria Smith, who I am anxious for you all to meet. Annette and Maria will both be on board by the time you receive this letter, and I hope you will join me in welcoming them. I know you will support them with the same enthusiasm that you showed to me.

Our work, as an organization has expanded tremendously over the past year. Now, with a full staff we will move forward at a renewed pace. I want to thank the committees for all of your work. Without dedicated members, it would be impossible to achieve all the things that NNOHA has accomplished.

I have truly enjoyed my time with NNOHA, and re-connected with my “first” profession in oral health. I leave, knowing that the organization is in excellent hands with Annette at the helm. With the support of the Board and members, she and your outstanding staff will continue to grow and develop NNOHA into an even greater voice for the oral health care needs of the underserved.

With Best Wishes for a Successful Future,

Barbara E Bailey
INTRODUCING: NNOHA’s Corporate Advisory Committee

Andrea Hight, Regional Manager/Community Health Liaison, Special Markets, Henry Schein

It Starts With A Commitment

Several years ago, NNOHA’s Executive Leadership sat down with Hal Muller, president of Henry Schein’s Special Markets Division to discuss how to improve support and resources for NNOHA and its members.

Schein, a long-time contributor to NNOHA initiatives, has long realized how important NNOHA is as a national advocate for the underserved and safety net programs. That said, there is so much more that could be done – with the right support. As we all know, finding that funding, no matter how worthy the cause, can be a challenge.

Community health and other public health clinics need an advocate like NNOHA. NNOHA understands the issues impacting program viability and effective delivery of dental care. We all want to help, but there are limits to how much we can do.

Mr. Muller had an idea. He knew that he needed a way to continue to support and help NNOHA, not just for the present but for years to come. To do that, he would need help. The old adage, ‘it takes a village’, remains true. What was needed was a “village,” a Corporate Advisory Committee to bring together dental product manufacturers who share and believe in NNOHA’s mission. Mr. Mueller then began organizing…

The Corporate Advisory Committee

The Corporate Advisory Committee is made up of representatives from various companies that provide superior products and systems that are specifically suitable for community health dentistry – from high-performing diagnostic, preventive and restorative materials to large equipment, technology and software. Each member company has also already demonstrated a strong commitment to community health and to NNOHA by annually attending and exhibiting at the National Primary Oral Health Conference, sponsoring speakers and contributing in other ways to the conference’s success. All of the products represented by the manufacturers serving on the committee are available through Henry Schein.

Committee members work behind the scenes, meeting regularly to review NNOHA’s goals and needs and working to contribute in a variety of ways to meet those needs. Each year NNOHA leaders create a ‘Wish List’, a comprehensive description of everything NNOHA could possibly need. The committee members review the list and then commit to contributing to the extent necessary to completely address one or more of those needs.

In addition to Committee membership fees paid to NNOHA, members may pay for postage, publications, conference speakers, cookies, or draw on their in-house marketing and IT experts for special projects. Their contributions allow NNOHA to leverage its grant funding so the organization will grow and its impact will help each community health dental program better meet its patients’ needs.

The Corporate Advisory Committee presently includes the following members: Sultan, Dentsply, Sybron/Kerr, ADI, Dentrix Enterprise, 3M ESPE, GC America, the Kavo family of products and Henry Schein.

Getting To Know You

This year, Advisory Committee members want to get to know the NNOHA membership even better. They want to understand how to bring to community health clinicians the most suitable solutions and products to help them improve oral health outcomes.

Recently Dave Bangert, VP and General Manager for Special Markets for the Kavo Group of products visited Erie Family Heath Center in Chicago, Illinois. There, Dr. Lee Francis, the Executive Director, graciously gave him a tour. Dave was impressed with “the ‘complete’ approach to total health.”

Mr. Bangert noted, “Erie has created a warm and welcoming environment that seems to draw patients back for the necessary follow-up they need and thereby delivering better long-term outcomes for the people of the community.” Mr. Bangert said that if he could share only one impression, it would be “the power of creativity and entrepreneurial approach that Dr. Francis and his team have taken…(they) don’t settle for the status quo or what others in the community may expect… but use all available resources to continue to raise the bar for patient service.”

(Continued on page 4)
MAKING CHANGE TOGETHER: NNOHA and ASTDD Commit to Increased Collaboration in the New Year

Christine Wood, RDH, BS, ASTDD Executive Director

As part of their ongoing commitment to building bridges with fellow oral health experts, the Association of State and Territorial Dental Directors (ASTDD) and NNOHA are proud to announce that we are establishing a greater partnership. With this partnership, ASTDD and NNOHA expect to broaden our strategic partnerships in order to expand vital oral health services to a greater number of underserved populations.

To that end, ASTDD’s Katherine Weno, D.D.S., J.D., will now serve as liaison to NNOHA. As NNOHA members may already know, ASTDD provides leadership to promote a governmental oral health presence in each state and territory, to formulate and promote sound oral health policy, to increase awareness of oral health issues, and to assist in the development of initiatives for prevention and control of oral diseases.

Dr. Weno is the Director of the Bureau of Oral Health at the Kansas Department of Health and Environment (KDHE) in Topeka, Kansas. The Bureau administers several public oral health programs including: School Sealant programs, a Dental Workforce Recruitment Center, Fluoride Varnish Instruction for Medical Providers, and a program to increase oral health access for Children with Special Health Care Needs. The KS Bureau of Oral Health and their Primary Care Association (the Kansas Association for the Medically Underserved) work collaboratively on many oral health programs, specifically assisting Health Centers with dental clinic sustainability and dental professional recruitment.

ASTDD liaisons are charged with identifying potential opportunities to move the relationship between ASTDD and its partner organization to increasingly higher levels of collaboration. Examples of how this can be accomplished include:

- Encourage ASTDD members to be members of partner organizations;
- Attend partner organizations’ annual meeting and encourage their members to attend the National Oral Health Conference (NOHC);
- Collaborate on review of policy statements or resolutions;
- Sign onto advocacy letters;
- Participate on a partner organizations’ committee and encourage them to participate on the ASTDD committees;
- Submit articles to partner organizations’ newsletter and encourage them to submit articles to the ASTDD newsletter;
- Provide links on websites;
- Post partner information on listservs;
- Support NOHC or special focus meetings;
- Provide letters of support for grants.

Dr. Weno’s efforts to work more closely with NNOHA will certainly contribute to increasing NNOHA’s capacity to spread its message of oral health access. For instance, NNOHA and ASTDD have worked together recently to promote the HRSA funding opportunity, “Grants to States to Support Oral Health Workforce Activities” (For more information regarding this opportunity, refer to the “Did You NNOHA” section). Look to future newsletter articles for progress about what we accomplish.

For more information about ASTDD, please visit: www.astdd.org.

Evaluation of Safety Net Solutions, NNOHA’s Technical Assistance Partner

Aimee Bernard, PhD and Robin Koenigsberg, PhD
Think2 Consulting

Technical assistance (TA) is a specialized form of practice management consulting made available to health care providers that aims to improve operational efficiency, quality of care and long-term growth and sustainability. A number of organizations and individual experts offer technical assistance services but only a few, including Safety Net Solutions (SNS), focus on dental programs within Health Centers.

Safety Net Solutions

Founded in 2006, Safety Net Solutions provides individualized technical assistance that helps oral health safety-net programs balance mission and business to better serve their patients. Through multiple practice analysis tools including site surveys, program analysis and assessment of a wide range of operational elements, Safety Net Solutions designs individualized practice enhancement plans that are intended to fit the unique environment and circumstances surrounding each safety-net dental clinic evaluated.

NNOHA contracted with Think2 Consulting to perform an independent evaluation of the efficacy and success of the technical assistance provided by Safety Net Solutions, a program of the DentaQuest Institute. The evaluation process included questions in the national NNOHA Technical Assistance (TA) Survey administered online in May 2011 to NNOHA’s members and a telephone survey of 5 randomly selected SNS clients. The evaluation looked at the following variables:

☑ The extent of provided services
☑ The clinic’s satisfaction with provided services
☑ The impact and tangible outcomes of outside technical assistance

Results from the NNOHA Online TA Survey

Six of the forty-three clinics in NNOHA’s online survey that received technical assistance reported partnering with SNS. Of the six clinics, three were far enough along in their implementation of the practice management plan to provide feedback regarding the impact of technical assistance. All three clinics felt the technical assistance services provided by SNS contributed to:

- improved net revenues
- Improved operational efficiency
- increased patient access to dental care

Additionally, all six clinics indicated they would recommend SNS for practice management consulting services to another clinic.

Findings from Interviews with SNS Clients

Think2 Consulting conducted interviews with CEOs, Executive Directors and/or Dental Directors at five randomly selected FQHCs that received technical assistance from SNS. Effectiveness was assessed through several specific questions addressing:

- The extent of provided services
- The clinic’s satisfaction with provided services
- Tangible outcomes as a result of provided services

Each of the five clinics reported a variety of improvements, chief among them scheduling process improvements and revenue increases, since implementing the practice management plan created in coordination with SNS. The clinics offered comments regarding their overall satisfaction with the services provided:

- A Dental Director in Hyannis, MA, found the recommendations provided by SNS to be “invaluable,” particularly those related to billing protocol, practice management, scheduling, and talking points and options for incentive programs.
- The Executive Director for a Health Center in Ohio saw “significant improvement” related to operational efficiencies and was “quite happy” with the services provided by SNS.
- Another CEO in North Carolina said that he would “unequivocally” recommend SNS to other Health Center dental clinics and that the services provided helped to “maximize the scheduling process and improve revenue.”

(Continued on page 6)
MEMBER SPOTLIGHT

Mitsuko Ikeda
NNOHA Project Director

Community Healthcare Network (CHN) is a Federally Qualified Health Center that provides access to quality, culturally competent, and comprehensive community-based primary care, mental health services, and social services for diverse populations in underserved communities in four boroughs of New York City. As a network of twelve health centers and one medical mobile unit, CHN reaches over 65,000 individuals each year. CHN provides a wide range of health services including family planning services, HIV counseling and testing, social services, mental health programs, complementary medicine, adolescent pregnancy prevention and education, dental services, and nutritional counseling.

CHN joined NNOHA in 2011 as an Organizational Member. NNOHA interviewed Dr. Gregory Taddeo, Dental Director at CHN, for this issue of the newsletter.

What is your community like?

CHN’s centers serve federally-designated medically underserved areas including Tremont and the South Bronx; Crown Heights/Bedford-Stuyvesant, East New York, and Williamsburg/Bushwick in Brooklyn; Central Harlem, the Lower East Side and Washington Heights in Manhattan; and the Jamaica and Long Island City neighborhoods of Queens. All of the communities served by CHN have been identified as experiencing more barriers to health care access and poorer health outcomes when compared to other neighborhoods in New York City. High poverty rates, unemployment, crime, poor housing and failing schools also characterize these neighborhoods.

Of the over 65,000 reached each year, more than 95% are people of color, and a large number of the agency’s clients are immigrants and the working poor. Approximately 30% of CHN’s patients are uninsured and 45% are insured through Medicaid. Nearly 77% have incomes below the federal poverty level. Nearly 30% of CHN’s patients are under the age of 19, while individuals 50 years and older represent 14% of the agency’s patient base. Patients receive care regardless of immigration status, race/ethnicity, sexual orientation, age, or ability to pay.

What are you doing well that you’d like to share with us?

Our clinics provide full-spectrum dental care in Periodontics, Prosthodontics, Pedodontics, Endodontics, Oral Surgery, and Restorative Cosmetic dentistry. We coordinate outreach programs to promote pa-
tient care. CHN has also been successful in medical-dental integration. Our organization implemented electronic dental records and digital radiography via open dental software in our electronic medical records (eCW). This means that physicians and dentists can see each others’ records—very beneficial for diagnosing and treatment planning.

We also have a strong support from the management team and the board. Thanks to their support, CHN received digital x-ray equipment from Toms of Maine through the “Toms of Maine Honorarium Grant 2009” for Federally Qualified Health Centers. Drawing from this experience, I lectured at the Community Healthcare Association of New York State (CHCANYS) Statewide Conference & Clinical Forum 2011 on Integrating EMR to Improve Diagnosis and Treatment for Dental Health Services.

Do you have any strong partnerships in the community?

Each of CHN’s service sites has developed formal linkage and referral system arrangements with a multiplicity of agencies that provide a range of services including hospitals, other healthcare providers, substance abuse providers, social service agencies, and advocacy groups. Referral and linkage agreements are regularly updated and CHN staff continuously work to identify new sites and resources for the agency’s clients. The agency currently maintains over 250 formal linkage agreements with service providers and community-organizations city-wide.

How do you interface with the medical department?

We conduct Daily Morning Huddle with all staff (nurses, providers, medical office specialists etc), as well as Monthly Provider Meeting and Clinic Meeting, to maintain communication. Furthermore, our EHR has been programmed so that a clinical pop-up global alert notifies providers/nurses to refer patients to dental services.

Has NNOHA been helpful to you in some way?

It was my resource on MANY an occasion. I refer to your resources often, and I read your monthly newsletter to develop ideas/strategies to help my dental department grow. Aside from my personal benefits, CHN was awarded the Henry Schein Cares’ Global Product Donation Program last year (http://www.nnoha.org/hennyschein.html).

What do you “know now that you wish you knew then?” or what advice would you give to a new HC Dental Director?

One thing I can say is “GO DIGITAL” in order to increase your productivity. CHN center’s visits have increased from 2,700 to roughly 10,000 because of electronic health records and digital radiography. Higher image quality and resolution along with Caries Detection software (via Open Dental) will facilitate and improve “diagnosis and treatment planning.” It also leads to less patient waiting time and shorter appointments.

Another benefit of going digital is eliminating disposal of lead foil x-ray encasing and possible exposure to harmful developing chemicals (which meets the Joint Commission compliance). It also cuts your postage cost, because digital x-rays can be emailed in reference to pre-authorizations and referrals.

What is your wish list?

My wish list is to have dental services in all of our satellite clinics, thereby enabling us to meet the needs of the entire community without having any inter-office referrals.

My wish list is to have dental services in all of our satellite clinics, thereby enabling us to meet the needs of the entire community without having any inter-office referrals.”
Did You NNOHA?

**New Resource Available:** As part of a cooperative agreement with HRSA, NNOHA conducted a needs assessment of Health Center Dental Directors and follow-up interviews with nine “early adopter” organizations that have made substantial progress integrating oral health into the Patient-Centered Health Home. The results are compiled in the new publication, “Oral Health and the Patient-Centered Health Home: Action Guide.” Visit [http://www.nnoha.org/generalpage.html](http://www.nnoha.org/generalpage.html) to download the document!

...  

...  

**HRSA Funding Opportunities:** The Health Resources and Services Administration (HRSA) is currently soliciting grant applications “to address the dental workforce needs of designated dental health professional shortage areas…” Eligible applicants include Governor-appointed, state government entities, including, but not limited to, the designated State Oral Health Program. NNOHA encourages you to reach out to appropriate state government agencies in your states for this wonderful opportunity and work with them as partners when appropriate. The closing date for applications is April 4, 2012. Check out [http://bit.ly/wqaM2i](http://bit.ly/wqaM2i) for all pertinent information, or contact us at info@nnoha.org.

For other grant opportunities, visit: [http://www.hrsa.gov/grants/index.html](http://www.hrsa.gov/grants/index.html)

...  

**HRSA Releases an Oral Health IT Toolbox:** HRSA developed an Oral Health IT Toolbox as a resource for health centers and other safety net and ambulatory care providers who are seeking to implement health IT. The toolbox can be accessed at: [http://www.hrsa.gov/healthit/toolbox/oralhealthittoolbox/index.html](http://www.hrsa.gov/healthit/toolbox/oralhealthittoolbox/index.html).

---

**UPCOMING WEBINAR**

“Oral Health, Systemic Health & Pharmacology”

**Monday, March 5, 2012**

10:30am-12:00pm Pacific / 11:30am-1:00pm Mountain / 1:30pm -3:00pm Eastern

**Presenters:**

**Bob Russell, DDS, MPH**  
(Dental Director, Iowa Department of Public Health and NNOHA Board Member)

**Sandra Leal, PharmD**  
(Director of Clinical Pharmacy, El Rio Health Center)

**Summary:** Oral health coupled with systemic health are well understood to be foundations for improved health outcomes and quality of life for patients. This presentation will address the important opportunity to understand the linkage between oral and systemic health, as well as the value of medication review to improve common concerns for patients. Strategies for collaboration between dental providers, medical providers, and patients will be explored to identify and resolve common barriers to improve both oral and systemic health.

---

**Register Today!**

**2012 National Primary Oral Health Conference**

September 30-October 3, 2012

Hilton Torrey Pines, La Jolla, CA

[http://www.nnoha.org/conference/npohc.html](http://www.nnoha.org/conference/npohc.html)
Upcoming Conferences & Events

Here are some upcoming conferences in 2012. For more detailed list, please visit: http://www.nmoha.org/conference/links.html:

- The 2012 American Dental Education Association (ADEA) Annual Session & Exhibition will take place March 17-21, 2012, in Orlando, FL. For more information visit: http://www.adea.org/2012ANNUALSESSION/Pages/default.aspx.

- The American Association for Dental Research (AADR)/IADR Annual Meeting will take place in Tampa, FL, March 21-24, 2012. For more information, visit http://www.aadronline.org/i4a/pages/index.cfm?pageid=3941

- IHI’s 13th Annual International Summit on Improving Patient Care in the Office Practice & the Community will take place March 18-20, 2012 in Washington, DC. For more information, visit http://www.ihi.org/offerings/Conferences/Summit2012/Pages/default.aspx

- The National Association of Community Health Centers (NACHC) 2012 Policy & Issues Forum will take place March 21-24, 2012 in Washington, DC. For more information, visit: http://meetings.nachc.com/?page_id=78

- The 24th Annual Meeting on Special Care Dentistry will take place April 26-29, 2012 in Scottsdale, AZ. For more information, visit http://www.scdaonline.org/?page=AnnualMeeting

- The 2012 American Dental Hygienists’ Association (ADHA) Annual Session will take place June 13-19, 2012, in Phoenix, AZ. For more information, visit http://www.adha.org/annualsession2012/index.html

- The 2012 National School-Based Health Care Convention will take place in Albuquerque, NM, June 24-27, 2012. For more information, visit: http://www.nasbhc.org/site/c.ckLQKbOVIkK6E/b.7505261/k.2727/Convention.htm

Does your Health Center feel the need for training general dentists in pediatric dentistry? The American Academy of Pediatric Dentistry (AAPD) offers its Comprehensive Pediatric Dentistry for the General Practitioner program on multimedia formats. For more information, visit: http://bit.ly/vyb5j9p. Stay tuned for in-person sessions of the training in the near future. For other CE opportunities provided by AAPD, visit: http://www.aapd.org/events/default.asp.
Member Recognition

ORGANIZATIONAL AND ASSOCIATION MEMBERS

These organizations became 2012 Organizational or Association Members of NNOHA between November 1, 2011 and February 1, 2012. We recognize their commitment to supporting NNOHA and improving access to oral health services for the underserved.

- American Dental Association – Steven Geiermann
- Bullhook Community Health Center, Inc. – Cindy Smith
- Canyonlands Community Health Care - Jaree Chambers
- Christ Community Health Services – Orpheus Triplett
- Family Health Center of Marshfield, Inc. – Greg Nycz
- Family Health/La Clinica – Ted Kay
- Harbor Health Services – David Reidy
- HealthNet Inc. – Philip Woller
- HealthPoint – John Caron
  Hudson River Healthcare, Inc. – Clifford Hames
- Interior Community Health Center – Jeffrey Kilgore
- Jordan Valley Community Health Center – Brooks Miller
- KUMC Rural Health Education and Services – Joyce Grayson
- Lake Superior Community Health Center – Eric Elmquist
- Lincoln County Community Health Center/Northwest Community Health Center – Maria Clemons
- Mariposa Community Health Center – John Betz
- Native American Health Center, Inc. – Carolyn Brown
- Quality Community Health Care, Inc. – Marcella E. Lingham
- Salud Family Health Center – John McFarland
- SEMO Health Network – Gail Redman
- Shawnee Health Service and Development Corporation – Patsy Jensen
- Terry Reilly Health Services – Timothy Brown
- Uncompahgre Medical Center – Steve Siegel
- Unity Health Care, Inc. – Diana Lapp
- Valley Health Systems, Inc. – Dan Brody

INDIVIDUAL MEMBERS

NNOHA currently has over 1,800 members. The following people have initiated or renewed their NNOHA membership between November 1, 2011 and February 1, 2012, and we recognize them for their commitment.

The National Network for Oral Health Access (NNOHA) is a nationwide network of dental providers who care for patients in safety-net systems. These providers understand that oral disease can affect a person’s speech, appearance, health, and quality of life and that inadequate access to oral health services is a significant problem for low-income individuals. The members of NNOHA are committed to improving the overall health of the country’s underserved individuals through increased access to oral health services.

“Mission of NNOHA is to improve the oral health of underserved populations and contribute to overall health through leadership, advocacy, and support to oral health providers in safety-net systems.”
DONATIONS

Making a gift to the National Network for Oral Health Access is one of the easiest ways to positively impact our work, enhance our services, and help our community strengthen and increase access to oral health services. We would like to thank the following individuals for their sincere contribution to help us aid in our mission for 2012.

- Don Altman
- Barbara Bailey
- Charlyne Mason-Dozier
- Huong Le
- Hazel Moore
- Hal Muller
- Christina Dahlke Sopiwnik
- Julie A. Vavruska
- Burt Waller

2012 NNOHA MEMBERSHIP APPLICATION

October 1, 2011-September 30, 2012
Please complete the following information and mail to:
PMB: 329, 3700 Quebec Street, Unit 100,
Denver, CO 80207-1639

Select one:
____ Annual Individual membership $50.00
____ Dental Hygienists or Dental Assistants $30.00
____ Annual Organizational membership $350.00
(If you select organizational membership, please attach a separate sheet with names, titles, and E-mail address of those included.)

Committees:
____ I am interested in receiving committee information.
____ I am not interested in participating on a committee at this time.

Method of Payment:
____ Check
____ Bill Me
____ Credit Card

Empower Your Organization to Make Meaningful Connections.

If maximizing the ability to provide exceptional patient care is a high priority for your organization, you know that you need to connect effectively with your partners.

Dentrix Enterprise empowers you to make those meaningful connections. Not only is Dentrix Enterprise the leading practice management software for community health centers, dental practice management groups and educational institutions, it is also interoperable with over 40 EHR systems, many of which are certified for meaningful use. In fact, many Dentrix Enterprise customers have already secured meaningful use funding.

With multi-site access, an intuitive user interface and centralized management and reporting, Dentrix Enterprise is the most complete practice management available.

Get Connected today.
