Dates: September 12-14, 2010
Location: The Planters Inn
112 North Market Street
Charleston, South Carolina

2011 Symposium on Oral Health and Primary Care
September 25 – 27, 2011
Location
Rensselaer Meeting Center
63 Hayek Road
Rensselaer, NY 12144
High Quality Curricular Tools

Smiles for Life is the nation's only comprehensive oral health curriculum. Developed by the Society of Teachers of Family Medicine Group on Oral Health and now in its third edition, this curriculum is designed to enhance the role of primary care clinicians in the promotion of oral health for all age groups through the development and dissemination of high-quality educational resources.

For Individual Clinicians

We've made it easy for individual physicians, physician assistants, nurse practitioners, students, and other clinicians to access the curriculum and learn on their own time and at their own pace. Each of the courses is available online. Free CME credit is available.

For Educators

The curriculum is available in a presentation format easily implemented in an academic setting. Included is a comprehensive set of educational objectives based on the Accreditation Council for Graduate Medical Education (ACGME) competencies, test questions, resources for further learning, oral health web links, an implementation guide, and detailed outlines of the modules.

Thought Leader’s Corner
Each month, Medical Home News asks a panel of industry experts to discuss a topic of interest to the medical home community. To suggest a topic, write to Editor@MedicalHomeNews.com

Q. This month’s issue contains a “Call to Action” to link oral health and primary care much more closely. How do you do that in your own organization or how would you like to see it done in the medical or health home?”

“Oral health is an agency priority. Oral health improvement in medically underserved communities (HRSA’s target population) requires comprehensive approaches, including linkages with primary care and public health.

More than three-quarters of HRSA-funded health centers provide direct dental care. Co-location of dental care with primary care is a step in the process to provide access to oral health care but, to make further progress, the two must be integrated.

The availability of a skilled workforce in both oral health and primary care is essential.

HRSA partners with other federal agencies and non-governmental stakeholders in promoting oral health as an integral part of a medical and health home.”

Marcia K. Brand, PhD
Deputy Administrator
Health Resources and Services Administration (HRSA)
U.S. Department of Health & Human Services
Rockville, MD
HRSA “IPOHCC” Initiative

• **Response to IOM Report:** recommendation to develop a core set of oral health competencies for health professionals (“improving Access to Oral Health Care for Vulnerable and Underserved Populations”, July 2011)

• **Purpose:**
  1. Develop a standardized set of core oral health competencies for primary care providers and strategies to enhance oral health primary care team approaches to patient care
  2. Develop strategies for adoption and implementation of the core clinical competencies focused on HRSA supported safety net settings

• **Process:** *Three meetings  (April, June, Sept 2012)*

• **Outcome:** *Due Spring, 2013*
